

About the Contributors

Chia-Hung Wei is currently an assistant professor of the Department of Information Management at Ching Yun University, Taiwan. He obtained his Ph.D. degree in Computer Science from the University of Warwick, UK, and Master's degree from the University of Sheffield, UK, and Bachelor degree from the Tunghai University, Taiwan. His research interests include content-based image retrieval, digital image processing, medical image processing and analysis, machine learning for multimedia applications and information retrieval. He has published over 10 research papers in those research areas.

Yue Li received his Ph.D. degree in computer science from University of Warwick, UK, in 2009, M.S. in Information Technology from Department of Computer Science, University of Nottingham, UK, in 2005, and B.Sc. in Mathematics from Nankai University, China, in 2003. He is currently an assistant professor of Collage of Software, University of Nankai, China. He serves as a member of editorial review board of *International Journal of Digital Crime and Forensics*. His research interests include digital forensics, multimedia security, digital watermarking, pattern recognition, machine learning and content-based image retrieval.

Chih-Ying Gwo received his Bachelor degree from the National Tsing Hua University, Taiwan, M.S. degree in computer engineering from Syracuse University, New York, USA, and Ph.D. in electrical engineering from University of Southern California, USA. He is currently an assistant professor of Department of Information Management at Ching Yun University, Taiwan. His current research interests include online character recognition and pattern recognition.

Chris Armbruster, Max Planck Digital Library, Max Planck Society (Berlin), specialises in the financial, legal and technical framework of digital scholarly communication and of knowledge as scientific information. Current activities include a) understanding how metric research evaluation may not only judge but also serve the scientist, b) investigate sustainable scenarios for repository infrastructure; c) compare author and user behaviour as well as actual usage for repositories and journals. Chris is also the founder and Executive Director of the Research Network 1989 (www.cee-socialscience.net/1989), a network of internationally mobile scholars interested in the causes and consequences of the global conjuncture of the year 1989. An overview of his working papers and publications may be obtained at his author page <http://ssrn.com/author=434782>

About the Contributors

Stefano Berretti received the Laurea degree in Electronics Engineering and the Ph.D. in Information and Telecommunications Engineering from the University of Florence, Italy, in 1997 and 2001, respectively. In 2000, he received the post-Laurea degree in “Multimedia Content Design,” from the University of Florence. Since 2002 he is an Assistant Professor at the University of Florence, where he teaches “Operating Systems” and “Fundamentals of Computer Programming” at the School of Computer Engineering. Since 2001 he also teaches “Database Systems” at the post-Doctoral school in “Multimedia Content Design” of the University of Florence. His scientific interests are pattern recognition, content based image retrieval, 3D object partitioning and retrieval, 3D face recognition.

Bhargab B. Bhattacharya received the BSc degree in physics from the Presidency College, Calcutta, the BTech and MTech degrees in radiophysics and electronics, and the PhD degree in computer science from the University of Calcutta, India. Since 1982, he has been on the faculty of the Indian Statistical Institute, Calcutta, where he is a full professor. He held visiting positions in the Department of Computer Science and Engineering, University of Nebraska, Lincoln, from 1985 to 1987 and from 2001 to 2002 and in the Fault-Tolerant Computing Group, Institute of Informatics, University of Potsdam, Germany, from 1998 to 2000. In 2005, he visited the Indian Institute of Technology, Kharagpur as a VSNL chair professor. His research interests include logic synthesis and testing of VLSI circuits, physical design, digital geometry, and image-processing architecture. He has published more than 220 papers in archival journals and refereed conference proceedings and holds nine US patents. He is on the editorial board of the Journal of Circuits, Systems, and Computers and the Journal of Electronic Testing—Theory and Applications. He is a fellow of the Indian National Academy of Engineering, a fellow of the National Academy of Sciences, India, a fellow of the IEEE, and a member of the IEEE.

Partha Bhowmick graduated from the Indian Institute of Technology, Kharagpur, India, and received the master’s and PhD degrees from the Indian Statistical Institute, Kolkata, India. He is currently on the faculty of Computer Science and Technology, Indian Institute of Technology, Kharagpur, India. His research interests include digital geometry, low-level image processing, approximate pattern matching, shape analysis, and biometrics. He has published more than 40 research papers in international journals, edited volumes, and refereed conference proceedings, and holds three US patents.

Arindam Biswas graduated from Jadavpur University, Kolkata, India, and received his master’s degree from the Indian Statistical Institute, Kolkata, India, where he has submitted his doctoral thesis also. He is currently an assistant professor in the Department of Information Technology, Bengal Engineering and Science University, Shibpur, India. His research interests include digital geometry, image processing, approximate shape matching and analysis, and biometrics. He has published over 30 research papers in international journals, edited volumes, and refereed conference proceedings, and holds one US patent.

Hua-Tsung Chen received his BSc and MSc degree in computer science and information engineering from National Chiao Tung University, Hsinchu, Taiwan in 2001 and 2003, respectively, and the PhD degree in Computer Science from National Chiao Tung University in 2009. He is currently a postdoctoral research fellow with National Chiao Tung University, Hsinchu, Taiwan. His research interests include computer vision, video signal processing, content-based video indexing and retrieval, multimedia information system and music signal processing.

Sherry Y. Chen is a reader in the School of Information Systems, Computing and Mathematics at Brunel University. She obtained her PhD from Department of Information Studies, University of Sheffield, UK in 2000. Her current research interests human-computer interaction, data mining, digital libraries, and educational technology. She has published widely in these areas. Chen is the associate editor of *Online Information Review* and *International Journal of Digital Library Systems*. In addition, she acts as a member of the editorial board for ten computing journals. Chen is also the editor of several research books, including *Adaptable and Adaptive Hypermedia Systems* and *Advances in Web-based Education: Personalized Learning Environments*.

Paul Clough is a lecturer in information systems in the Department of Information Studies, University of Sheffield (UK). He received his Bachelor's degree in engineering from the University of York in computer science while also working for British Telecommunications Plc. as a software engineer. He received his PhD from the Department of Computer Science, University of Sheffield and has since worked as a researcher on a range of language engineering and information access projects. Clough is member of the Information Retrieval (IR) group and his core research interests are information retrieval (Geographical IR, multimedia IR and evaluation), computational text analysis (plagiarism detection, authorship attribution and creating corpora) and human-computer interaction. He has over 60 peer-reviewed publications in his research area and a US patent for an information management system.

Didier Coquin received the PhD degree in signal processing and telecommunication from University of Rennes I, France, in 1991. He is currently an Assistant Professor of telecommunication and network engineering at the Savoie University (Technological Academic Institute) and works in the Informatics, Systems, Information and Knowledge Processing Laboratory (LISTIC), Annecy, France. His research interests include image processing, pattern recognition, image and video indexing, data fusion, and fuzzy logic.

Alberto Del Bimbo is Full Professor of Computer Engineering, President of the Foundation for Research and Innovation, Director of the Master in Multimedia, and Director of the Media Integration and Communication Center at the University of Florence. He was the Deputy Rector for Research and Innovation Transfer of the University of Florence from 2000 to 2006. His scientific interests are Multimedia Information Retrieval, Pattern Recognition, Image and Video Analysis and Natural Human Computer Interaction. He has published over 250 publications in some of the most distinguished scientific journals and international conferences, and is the author of the monography "Visual Information Retrieval". From 1996 to 2000, he was the President of the IAPR Italian Chapter, and, from 1998 to 2000, Member at Large of the IEEE Publication Board. He was the general Chair of IAPR ICIAP'97, the International Conference on Image Analysis and Processing, IEEE ICMCS'99, the *International Conference on Multimedia Computing and Systems* and Program Co-Chair of *ACM Multimedia 2008*. He is the General Co-Chair of *ACM Multimedia 2010* and of *ECCV 2012*, the *European Conference on Computer Vision*. He is IAPR Fellow and Associate Editor of *Multimedia Tools and Applications*, *Pattern Analysis and Applications*, *Journal of Visual Languages and Computing* and *International Journal of Image and Video Processing*, and was Associate Editor of *Pattern Recognition*, *IEEE Transactions on Multimedia* and *IEEE Transactions on Pattern Analysis and Machine Intelligence*.

About the Contributors

Irene Eleta received her Bachelor's degree in translation and interpretation from Universidad Autonoma de Madrid (Spain) in 2006 and her Master's degree in multilingual information management from The University of Sheffield (UK) in 2008. She is currently pursuing the PhD in information studies at The University of Maryland, College Park (USA). Her research interests include: multilingual and cross-language information retrieval, digital libraries, user searching behavior and evaluation of information retrieval systems.

Gheorghita Ghinea received the BSc and BSc (Hons) degrees in Computer Science and Mathematics, in 1993 and 1994, respectively, and the M.Sc. degree in Computer Science, in 1996, from the University of the Witwatersrand, Johannesburg, South Africa; he then received the PhD degree in Computer Science from the University of Reading, United Kingdom, in 2000. He is a Reader in the School of Information Systems and Computing at Brunel University, United Kingdom. Ghinea has over 100 refereed publications in his research interests, which span perceptual multimedia networking, semantic media management, and human computer interaction.

Ling Guan is a Tier I Canada Research Chair in Multimedia and a Professor of Electrical and Computer Engineering at Ryerson University, Toronto, Canada. He received his Bachelor's Degree from Tianjin University, China, Master's Degree from University of Waterloo, Canada and Ph.D. Degree from University of British Columbia, Canada. His research interests are in image, video and multimedia signal processing and have published extensively in the field. Dr. Guan currently serves on the editorial boards of IEEE Transactions on Multimedia and IEEE Transactions on Circuits and Systems for Video Technology. He chaired the 2006 IEEE International Conference on Multimedia and Expo in Toronto, and co-chaired the 2008 ACM International Conference on Image and Video Retrieval in Niagara Falls. Dr. Guan is a Fellow of the IEEE, a Fellow of Engineering Institute of Canada and a recipient of the 2005 IEEE Transactions on Circuits and Systems for Video Technology Best Paper Award.

Zhen Guo is a PhD student in Computer Science department at State University of New York at Binghamton. He has the BSc and M.Sc degrees both in Electrical Engineer from Xi'an Jiaotong University, China. He was a senior software engineer at UTStarcom Inc. at Shenzhen, China. He also worked as an Intern student at NEC Laboratories American at Cupertino, CA and Yahoo Labs at Santa Clara, CA. His research interests are machine learning and the applications to data mining, information retrieval, and computer vision. He has published several peer-reviewed academic papers in the premier data mining conferences and book chapters, and has served as reviewers or program committee members for many international journals and conferences.

Bogdan Ionescu is currently a Lecturer with University "POLITEHNICA" of Bucharest-Romania. He holds a BS degree in applied electronics (2002) and an MS degree in computing systems (2003), both from University Politehnica of Bucharest. He also holds a PhD degree in image processing and informatics (2007) from, both, the University of Savoie and University "Politehnica" of Bucharest. Between 2006 and 2007, he held a temporary Assistant Professor position with Polytech Savoie, University of Savoie. Between 2003 and 2007, he has attended the International Animated Film Market, Annecy, France, presenting solutions for the symbolic/semantic analysis of the animated movies. At the present time, he is in-charge with the Romanian CNCSIS Video Indexing RP2 project. His scientific interests

cover electronics engineering, artificial intelligence, image processing, computer vision, software engineering, and computer science. He is a Member of IEEE, SPIE, ACM, and GDR-ISIS.

Elahe Kani received the PhD degree in Computer Science in 2008 from Brunel University. Her areas of research interest span user interaction and digital libraries.

Eamonn Keogh is a Professor of computer science at the University of California, Riverside. His research interests include data mining, machine learning and information retrieval. Several of his papers have won best paper awards, including papers at SIGKDD and SIGMOD. Dr. Keogh is the recipient of a 5-year NSF Career Award for “Efficient Discovery of Previously Unknown Patterns and Relationships in Massive Time Series Databases.”

Dmitry Kinoshenko is a Senior Researcher of the Computer Science Department in Kharkov National University of Radio Electronics, Ukraine. Completed MD in ‘Informatics’ in 2004 and PhD in ‘Systems and Means of Artificial Intelligence’ in 2008 in Kharkov National University of Radio Electronics, Ukraine. Has over 40 publications including ones published in Springer and IEEE. In 2008 got the first place in ‘The best young scientist of the region’ competitions in ‘mathematics and informatics’ field. Science interests include image retrieval, database indexing, image and video processing.

Patrick Lambert received the engineer degree in electrical engineering in 1978 and the PhD degree in signal processing in 1983, both from the National Polytechnic Institute of Grenoble, France. He is currently Professor at the School of Engineering of University of Savoie, Annecy, France. His research interests include color image processing and video analysis.

Suh-Yin Lee received the BSc degree in electrical engineering from National Chiao Tung University, Taiwan, in 1972, and the MSc degree in computer science from University of Washington, Seattle, U.S.A., in 1975, and the PhD degree in computer science from Institute of Electronics, National Chiao Tung University. Her research interests include content-based indexing and retrieval, distributed multimedia information system, mobile computing, and data mining.

Alexandru Marin received an MSc degree in applied electronics from University “Politehnica” of Bucharest (2009). The graduation project entitled “Applying Stein’s principle in SENSE pMRI reconstruction,” was developed jointly with the Informatics Laboratory of the Institut Gaspard Monge, Paris-Est University. Between 2006 and 2009 he held several position as software consultant, software engineer, Java software developer with several international companies in the field. His main scientific interests cover image processing and analysis, data mining and computer science.

Vladimir Mashtalir is a dean of Computer Science faculty in Kharkov National University of Radio Electronics, Ukraine. Completed MD in 1979 in ‘Applied mathematics’, completed PhD in ‘Cybernetics and Information Theory’ in 1984 and Habilitatus in ‘Systems and Means of Artificial Intelligence’ in 2002. All in Kharkov National University of Radio Electronics, Ukraine. Since 2003 is Professor and Dean of Computer Science Faculty *ibid*. Has over 100 publications including monographies, papers

About the Contributors

and conference proceedings published all over the world. Research interests include image and video processing, pattern recognition.

Shyamosree Pal is a research scholar in the Department of Computer Science and Engineering at Indian Institute of Technology, Kharagpur, India. She has obtained her MTech degree in Computer Science from Bengal Engineering and Science University, Shibpur, India. Her specific areas of research include digital geometry and image analysis. She has published several research papers in related journals and conference proceedings of international repute.

Pietro Pala received the Laurea degree in 1994 from the University of Firenze. From the same University, he received the Ph.D. in Information and Telecommunications Engineering in 1997. Presently, he is Associate Professor at the University of Firenze where he teaches “Image and Video Analysis” and “Database Management Systems” at the school of Information Engineering and “Fundamentals of Multimedia and Programming Languages” at the Master in Multimedia Content Design. Pietro Pala is a member of the Board of the PhD in Informatics, Multimedia and Telecommunications, a member of the Board of the Master in Multimedia Content Design and a member of the MIUR Center of Excellence Media Integration and Communication Center of the University of Firenze. Pietro Pala is also President of the Board for Quality Assessment (CRUI Model of Quality) for both the Master in Multimedia Content Design and the school of Information Engineering. Pietro Pala carries out scientific research and technological experimentation in the area of Multimedia Information Processing and Analysis. In particular, recent research activities have focused on the analysis and definitions of models to support image based object recognition, content based retrieval of images and 3D models, segmentation of 3D models, 3D face recognition.

Jia-Yu Pan is currently at Google Inc., USA, working on anomaly detection and its applications in internet advertisement. He received his PhD degree from Carnegie Mellon University, and has received three best paper awards from the conferences ICDM 2006, ICDM 2005, and PAKDD 2004. His research interests include data mining on multimedia and graphs, clustering techniques, anomaly detection methods, and WWW technology. He has served on the program committees of several data mining conferences, and has co-chaired the Multimedia Data Mining workshops in conjunction with the conferences KDD 2008 and SIAM Data Mining 2009.

Laurent Romary got his PhD in computational linguistics in 1989 and his Habilitation thesis in 1999. Chargé de Recherche at CNRS then Directeur de Recherche at INRIA, he conducted various research activities on man-machine dialogue, multilingual document management and linguistic engineering. He has participated in several national and international projects related to the representation and dissemination of language resources and on man-machine interaction, and in particular coordinated the MLIS/DHYDRO, IST/MIAMM and eContent/Lyrics projects. He has been the editor of ISO standard 16642 (TMF – Terminological Markup Framework) and is the chairman since 2002 of ISO committee TC 37/SC 4 on Language Resource Management, as well as member (2001-2007) then chair (2008-) of the TEI council. After leading the Scientific Information directorate at CNRS, he established the Max-Planck Digital Library (Sept. 2006-Dec. 2008). Most publications are available under <http://hal.archives-ouvertes.fr/aut/laurent+romary/>

Christian Shelton is an Assistant Professor of computer science at the University of California, Riverside. His research focuses on statistical approaches to artificial intelligence, mainly in the areas of learning and dynamic processes. We work at the intersection of learning and topics as varied as computer vision, sociology, game theory, and computational biology.

Vladislav Shlyakhov is a Head Researcher of the Computer Science Department in Kharkov National University of Radio Electronics, Ukraine. Completed MD in 1979 in ‘Applied mathematics’ in Moscow State University, completed PhD in ‘Cybernetics and Information Theory’ in 1984 in Kharkov National University of Radio Electronics. Has over 80 publications including monographies, papers and conference proceedings published all over the world. Science interests include multi-algebraic systems, granular computing, metrical properties of n-arity relations.

Wen-Jiin Tsai received the BSc, MSc and PhD degrees in computer science and information engineering from National Chiao-Tung University, Hsinchu, Taiwan, in 1992, 1993 and 1997, respectively. She was a software manager at the DTV R&D Department of Zinwell Corporation, Hsinchu, Taiwan, during 1999-2005. She has been an Assistant Professor at the Department of Computer Science, National Chiao-Tung University, Hsinchu, Taiwan, since February 2005. Her research interests include video compression, video transmission, digital TV, and content-based video retrieval.

Constantin Vertan holds an image processing and analysis tenure at the Image Processing and Analysis Laboratory from the Faculty of Electronics, Telecommunications and Information Technology at the, Politehnica University of Bucharest (UPB). He was an invited professor at INSA de Rouen and University of Poitiers (France). For his contributions in image processing he was awarded with UPB’s. In “tempore opportune” award (2002) and with the Romanian National Research Council. In hoc “signo vinces” award (2004). His research interests are general image processing and analysis, CBIR, fuzzy and medical image processing applications. He is a member of SPIE, senior member of IEEE and secretary of the Romanian IEEE Signal Processing Chapter.

Xiaoyue Wang is a Ph.D. candidate in the Department of Computer Science and Engineering at the University of California, Riverside. She received her B.S. in Computer Science from Wuhan University, China. Her research interests include data mining and information retrieval. One of her focus is on mining historical manuscripts, where she designed image retrieval algorithms to index image archives such as historical images of data.

Ian H. Witten is professor of computer science at the University of Waikato, where he directs the New Zealand Digital Library research project. His research interests include language learning, information retrieval, and machine learning. He has published widely, including several books, such as *Managing Gigabytes* (1999), *How to build a digital library* (2003), *Data Mining* (2005) and *Web Dragons* (2007). He is a Fellow of the ACM and of the Royal Society of New Zealand. He received the 2004 IFIP Namur Award, a biennial honor accorded for “outstanding contribution with international impact to the awareness of social implications of information and communication technology” and the

About the Contributors

2005 SIGKDD Service Award for “an outstanding contribution to the data mining field” and in 2006 the Royal Society of New Zealand Hector Medal for “an outstanding contribution to the advancement of the mathematical and information sciences.”

Shaoqun Wu is a doctoral candidate in the Computer Science Department of the University of Waikato in New Zealand. Previously she worked on the open source Greenstone digital library software. Her present research is focused on automatic exercise generation for a second language acquisition system, particularly in the area of vocabulary acquisition.

Lexiang Ye is a fourth-year PhD student of computer science at the University of California, Riverside. Her research focuses on data mining and machine learning, especially on techniques for solving similarity and indexing problems in time-series datasets. She works primarily on designing generic data mining algorithms of similarity join, indexing and classification, and the applications are among astronomy, anthropology, entomology and human motion capture analysis.

Elena Yegorova is a Senior Researcher and Senior lecturer of the Computer Science Department in Kharkov National University of Radio Electronics, Ukraine. Completed her MPhil in ‘Information Technologies, Data Mining and Knowledge Discovering’ in 2006 in Wessex Institute of Technology, UK and PhD in ‘Systems and Means of Artificial Intelligence’ in 2007 in Kharkov National University of Radio Electronics, Ukraine. In 2008 was a guest editor of *Graphic Vision and Image Processing*, Cairo, Egypt. Has over 20 publications. In 2007 got the first place in ‘The best young scientist of the region’ competitions in ‘mathematics and informatics’ field. Science interests include image processing and pattern recognition.

Rui Zhang is affiliated with the Ryerson Multimedia Research Laboratory, Ryerson University, where is currently pursuing a PhD degree. He received his Bachelor’s and Master’s Degrees from Tianjin University, China, in 2002 and 2004. His research interests include statistical machine learning, pattern recognition, image retrieval and annotation. He has been with Microsoft Research Asia as a research intern in the summer of 2009.

Zhongfei Zhang is an associate professor at the Computer Science Department at State University of New York (SUNY) at Binghamton, and the director of the Multimedia Research Laboratory. He received a BS in Electronics Engineering (with Honors), an MS in Information Sciences, both from Zhejiang University, China, and a PhD in Computer Science from the University of Massachusetts at Amherst, USA. He was on the faculty of Computer Science and Engineering Department, and a research scientist at the Center of Excellence for Document Analysis and Recognition, both at SUNY Buffalo, before he joined the faculty of computer science at SUNY Binghamton. His research has been funded by a number of US federal government agencies, industry research labs, as well as a number of private foundations and foreign funding agencies. He holds more than ten inventions, is an author of two monographs and over 100 peer reviewed papers, and is currently in the editorial boards for several journals.
