About the Contributors

Zongmin Ma (Z. M. Ma) received the PhD degree from the City University of Hong Kong in 2001 and is currently a full professor in College of Information Science and Engineering at Northeastern University, China. His current research interests include intelligent database systems, knowledge management, the Semantic Web and XML, knowledge-bases systems, engineering database modeling, and enterprise information systems. Dr. Ma has published over 60 papers in international journals, conferences, edited books and encyclopedias in these areas since 1998. He also edited and authored several scholarly books published by Idea Group Publishing and Springer-Verlag, respectively.

Huaiqing Wang is a professor at the Department of Information Systems, City University of Hong Kong. He is also the honorary dean and a guest professor of the School of Information Engineering, Wuhan University of Technology, China. He received his PhD in computer science from University of Manchester, UK, in 1987. Dr. Wang specializes in research and development of business intelligence systems, intelligent agents and their applications (such as multi-agent supported financial information systems, virtual learning systems, knowledge management systems, conceptual modeling and ontology). He has published more than 40 international refereed journal articles.

* * *

Jingwei Cheng, is a PhD student at the Northeastern University, China. He received his bachelor's degree from the College of Information Science and Engineering, Jilin University, China. His research interests include fuzzy description logics and Semantic Web, intelligent information processing, and fuzzy query answering over tractable fuzzy description logics.

Alfredo Cuzzocrea received the Laurea Degree in computer science engineering on April 2001 and the PhD Degree in computer science and systems engineering on February 2005, both from the University of Calabria. Currently, he is a researcher at the Institute of High Performance Computing and Networking of the Italian National Research Council, and adjunct professor at the Department of Electronics, Computer Science and Systems of the University of Calabria. His research interests include multidimensional data modeling and querying, data warehousing and OLAP, data stream modeling and querying, XML data management, Web information systems modeling and engineering, knowledge representation and management models and techniques, Grid and P2P computing. He is author or co-author of more than 70 papers in referred international conferences (including SSDBM, WISE, DEXA, DaWaK, DOLAP, IDEAS, SEKE, FQAS, SAC) and journals (including JIIS, DKE, WIAS, JDIM). He serves as program committee member of referred international conferences (including ICDM, CIKM, ICDCS, PAKDD, ECAI, WISE, DEXA, DaWaK, DOLAP, ADMA, IDEAS, FQAS, SAC, APWeb,

WAIM) and as review board member of referred international journals (including TODS, TKDE, IS, DKE, INS, IJSEKE, FGCS, JDIM, JCST, IJKESDP). Up-to-date information is available at http://si.deis. unical.it/~cuzzocrea

Danica Damljanovic is a research associate in GATE team, Natural Language Processing Group, Department of Computer Science at the University of Sheffield, UK. Her scientific interests include knowledge sharing, ontologies, natural language processing, software engineering and application of artificial intelligence to tourism, specifically development of expert systems and semantic web applications. Currently she is working on semantically-enabled knowledge technologies by combining natural language processing with ontologies and knowledge discovery from structured content.

Vladan Devedzic is a professor of computer science at the University of Belgrade, FON - School of Business Administration, Department of Information Systems and Technologies. His long-term professional goal is to bring close together the ideas from the broad fields of intelligent systems and software engineering. His current professional and scientific interests include knowledge modeling, ontologies, intelligent reasoning techniques, Semantic Web, software engineering, and application of artificial intelligence to education and medicine.

Stathes Hadjiefthymiades received his BSc, MSc and PhD degrees in informatics from the Dept. of Informatics and Telecommunications, University of Athens (UoA). He also received a joint engineering-economics MSc from the National Technical University of Athens. In 1992 he joined the Greek consulting firm Advanced Services Group. In 1995 he joined the Communication Networks Laboratory (CNL) of UoA. During the period 2001–2002, he served as a visiting assistant professor at the University of Aegean, Dept. of Information and Communication Systems Engineering. On the summer of 2002 he joined the faculty of the Hellenic Open University, Patras, Greece, as an assistant professor. Since December 2003, he is in the faculty of the Dept. of Informatics and Telecommunications, University of Athens, where he is presently an assistant professor. He has participated in numerous EU & National projects. His research interests are in the areas of web engineering, mobile/pervasive computing and networked multimedia. He has contributed to over 100 publications in these areas. Since 2004 he coordinates the Pervasive Computing Research Group of CNL.

Kalapriya Kannan is a technical staff member at the IBM India research laboratory in Bangalore. Kalapriya has obtained her PhD from Indian Institute of Science, Bangalore and has been working in IBM for about 1 year. Her research interests spans systems and networks modeling and analysis, pervasive computing, streaming applications and systems management. Currently she has been working in the area of semantic web and knowledge extraction techniques and its applicability to reuse.

Lobna Karoui received a Master's in intelligent systems from the University Paris-Dauphine. She is currently a PhD student at the engineering school 'Supélec' and the University Paris-11 in France and teaches at the University Paris-Sorbonne. Her research interests include artificial intelligence, data mining and semantic web. She is working on research into ontology learning, knowledge acquisition and evaluation and has published in national and international conferences and journals. She has served on review committees and delivered presentations concept extraction and evaluation. Currently, she is participating in a national project related to two domains: ontology information retrieval and annotation.

Markus Klemen is lecturer at the Technical University of Vienna and Managing Director of Secure Business Austria. His research focuses mainly on applied concepts of IT-security and semantic database solutions. Markus graduated with a Master's degree in International Business Administration from the University of Vienna. During 10 years of work as IT-Security consultant and software project manager he carried out various customer projects. He introduced and thought several lectures on IT-Security at the Technical University of Vienna and was responsible for the IT-Management of the Institute for Software Technology and Interactive Systems.

Kostas Kolomvatsos received his BSc in informatics from the Department of Informatics at the Athens University of Economics and Business in 1995 and his MSc in computer science - new technologies in informatics and telecommunications from the Department of Informatics and Telecommunications at the National and Kapodistrian University of Athens (UoA) in 2005. He is now a PhD candidate in the National and Kapodistrian University of Athens – Department of Informatics and Telecommunications under the supervision of assistant professor Stathes Hadjiefthymiades. His research interests are in the areas of Semantic Web technologies, ontological engineering, agent technologies and pervasive computing.

Juanzi Li is now an associate professor at the Department of Computer Science and Technology (DCST), Tsinghua University. She got PhD degree from DCST, Tsinghua in January, 2000. Her research areas are Semantic Web and Semantic Web Services, Text Mining and Knowledge Discovery including Semantic Content Management, News Mining, and Semantic based Service Discovery and Composition. She is the principal investigators of and joins in many projects supported by Natural Science Foundation of China, National Basic Science Research Program, and International Cooperation Projects. She has published more than ninety papers on international journals/conferences such as WWW, SIGIR, ISWC, SIGKDD, CIKM, JoDS and JoWS. More information can be found on his homepage: http://juanzili.arnetminer.org/

Ning Li received her BEng degree in computer science and engineering department from Shandong University, China in 1997, and PhD degree in computer science from the University of Manchester, UK in 2002. She currently works as a research fellow at Centre for Communication System Research (CCSR) at the University of Surrey, UK. She is a work package coordinator for the UK DTI-funded ubiquitous services research programme. Her research interests include ubiquitous computing, Semantic Web and Web service.

Yi Li is now a third year master candidate in Department of Computer Science and Technology (DCST), Tsinghua University. He received his BE degree from the same department of Tsinghua University in 2005. His research interests include Semantic Web, ontology mapping. He had participated in the international ontology alignment contest (OAEI) in 2006 and 2007 and obtained good results.

Bangyong Liang is now an associate researcher in NEC Labs. China. He was born in 1978 and got PhD degree from Department of Computer Science and Technology, Tsinghua University in Jul, 2006. His research directions are ontology management, information retrieval and text processing. He has published more twenty research papers in conferences/journals such as ISWC, ASWC and WWW. More information can be found on his homepage: http://keg.cs.tsinghua.edu.cn/persons/lby

Federica Mandreoli is a research associate at the Department of Information Engineering of the University of Modena and Reggio Emilia, Italy. She holds a Laurea degree in computer science and a PhD in electronics engineering and computer science from the University of Bologna. Her scientific interests are in the field of information and knowledge management and, currently, mainly concerns data sharing in P2P networks and query processing over graph-structured data. As to those research themes, she is author of publications dealing with query processing in P2P networks, structural disambiguation for semantic-aware applications and personalized accesses to XML and ontologies and she joined national and international projects.

Riccardo Martoglia is a research associate at the Faculty of Mathematical, Physical and Natural Sciences of the University of Modena e Reggio Emilia. He received his Laurea Degree (*cum Laude*) and his PhD in computer engineering from the same university. He teaches a number of subjects in the area of databases, information systems, information retrieval and Semantic Web. His current research is about studying new methodologies for efficiently and effectively searching large and distributed (P2P) data repositories. He is author of many publications and book chapters about the above mentioned topics. He is a member of ACM and IEEE Computer Society.

Klaus Moessner is a senior research fellow in the Mobile Communications Research Group, at the Centre of Communication Systems Research (CCSR) at the University of Surrey. He earned his Dipl-Ing (FH) at the University of Applied Science in Offenburg, Germany, an MSc from Brunel University, UK and his PhD from the University of Surrey (UK). His main responsibilities within CCSR include conducting research, managing and co-ordinating different research contracts and projects, supervision of PhD and MSc students and teaching courses at postgraduate student level. He leads a research team on Software based systems and IP based internetworking technologies in CCSR. Klaus is responsible for the content and service adaptation work package in the Mobile VCE core 4 research programme Ubiquitous Services.

Wilma Penzo received the MS degree in computer science in 1993 from the University of Bologna, Italy, and the PhD degree in electronic and computer engineering from the same University in 1997. Since 1996, she has been a research associate at the Department of Electronics and Computer Science (DEIS), University of Bologna, and at the IEIIT Institute of Italian CNR (National Council of Research). Her main research interests include query processing in the Semantic Web, semantic peer-to-peer systems, fuzzy query languages for multimedia databases, semistructured databases, indexing and query processing in XML digital libraries. She has served as a reviewer for several international journals and conferences in the database area.

Livia Predoiu is a PhD student at the University of Mannheim, Germany, and has received her master degree from the University of Freiburg, Germany. Her research interests include probabilistic knowledge representation formalisms and distributed reasoning for the purpose of information integration on the Semantic Web. More information can be found on her homepage: http://webrum.uni-mannheim.de/math/lpredoiu/

Stefan Raffeiner completed his Master's in computer science at the Vienna University of Technology and focused on IT-security and data storage.

Simona Sassatelli is a PhD Student in computer science at the International Doctorate School in Information and Communication Technologies of the University of Modena and Reggio Emilia. She received her Laurea degree *cum laude* and her Laurea Magistralis degree *cum laude* in computer engineering from the same University. Her scientific interests are in the field of information and knowledge management and mainly concern data sharing and retrieval in P2P networks. She is author of publications about the above mentioned topics, with particular reference to semantic query routing and network organization. She is a member of ACM and IEEE Computer Society.

Biplav Srivastava is a research staff member at the IBM India research laboratory in New Delhi and Bangalore, India. Biplav has over 12 years of research experience of which 7 is in IBM Research (industrial setting). Biplav's research interests are in planning, scheduling, policies, learning and information management, and their practical applications in services -- infrastructure and software (web services), semantic web, autonomic computing and societal domains. Biplav has extensive research experience in web services and semantic web, and lead the influential Synthy http://domino.research.ibm.com/comm/research_people.nsf/pages/biplav.Synthy.html web services composition technology which was piloted at a major telecommunication company. Biplav has a PhD and Master's from Arizona State University, USA and a Bachelor's from IT-BHU, India, all in computer science. Biplav is the author of over 50 refereed papers and has over 20 patent filings and awards.

Heiner Stuckenschmidt is professor of computer science at the University of Mannheim where he leads the research group on knowledge representation and knowledge management. His research interests include distributed and large scale knowledge representation for semantic web applications and intelligent information systems. He received his PhD from the Vrije Universiteit Amsterdam in 2003 for a thesis on ontology-based information sharing. He is author of a book on information sharing on the semantic web and has published more than 50 papers in international journals and conferences. He served as member of the programme committee for the most important conference on semantic web technologies and is member of the editorial board of the Journal on Data Semantics.

Jie Tang is now an assistant professor in Department of Computer Science and Technology (DCST), Tsinghua University. He was born in 1977 and got Ph.D. degree from DCST, Tsinghua in Jul, 2006. His research directions are semantic annotation, ontology interoperability, text mining, and machine learning. He has published more than forty research papers in international conferences/journals, such as SIGKDD, ISWC, ASWC, ACL, ICDM, and WWW. He is the principal investigator of NSFC project, Minnesota/China Collaborative project, IBM innovative joint-research project, etc., and also took part in research projects including National Foundational Science Research (973), NSFC and several international cooperation projects. More information can be found on his homepage: http://keg.cs.tsinghua.edu.cn/persons/tj

Giorgio Villani is a PhD student in computer science at the International Doctorate School in Information and Communication Technologies of the University of Modena and Reggio Emilia. He received his Laurea degree and Laurea Magistralis degree *cum laude* in engineering management from the University of Bologna. His research focuses primarily on information retrieval and dataspace systems and, currently, mainly concerns query processing over graph-structured data.

Hailong Wang is a PhD student at the Northeastern University, China. He received his bachelor's degree from the College of Computer Science and Technology, Shandong University, China. His research interests include fuzzy knowledge representation formalisms, fuzzy rule reasoning, fuzzy extensions to OWL and the implementation technologies of the rule reasoning machine on the Semantic Web.

Edgar R. Weippl (CISSP, CISA, CISM) is science director of Secure Business Austria and university assistant at the Vienna University of Technology. His research focuses on applied concepts of IT-security and e-learning. Edgar has taught several tutorials on security issues in e-learning at international conferences, including ED-MEDIA 2003-2007 and E-Learn 2005. In 2005, he published *Security in E-Learning* with Springer. After graduating with a PhD from the Vienna University of Technology, Edgar worked for two years in a research startup. He then spent one year teaching as an assistant professor at Beloit College, WI. From 2002 to 2004, while with the software vendor ISIS Papyrus, he worked as a consultant for an HMO (Empire BlueCross BlueShield) in New York, NY and Albany, NY, and for Deutsche Bank (PWM) in Frankfurt, Germany.

Li Yan, is an associate professor at the College of Information Science and Engineering, Northeastern University, China. Her research interests include XML databases, intelligent information processing and fuzzy database modeling.

Limin Yao is a third year master candidate in Department of Computer Science and Technology, Tsinghua University. She earned her BE degree from Department of Computer Science in Xi'an Jiaotong University in 2005. Her research interests cover information extraction, semantic annotation, natural language processing, and information retrieval. She was an intern at Microsoft Research Asia. She had published several academic papers. For more details, please refer to her homepage http://keg.cs.tsinghua. edu.cn/persons/lmyao/

Duo Zhang is now a PhD candidate in Department of Computer Science at UIUC. He obtained his bachelor degree and master degree from Department of Computer Science at Tsinghua University respectively in 2005 and 2007. His research interests include information extraction, data mining, information retrieval, and statistical machine learning. He was a visiting student in Microsoft Research Asia from 2004 to 2006. For more details, please refer to his homepage: http://keg.cs.tsinghua.edu. cn/persons/duozhang

Anna V. Zhdanova is a senior researcher at ftw. – Telecommunications Research Center Vienna, Austria. Earlier she worked as a researcher at the University of Surrey, UK, and at DERI, University of Innsbruck, Austria. Anna has been a doctoral student in Informatics at the University of Innsbruck and has defended her PhD thesis "An approach to ontology construction and its application to community portals" in 2006. She has received a diploma in mathematics and computer science equivalent to the Master's degree in 2003 from Novosibirsk State University, Russia. She is an author of more than 30 refereed papers in international journals, conference and workshop proceedings.
