**Syagnik (Sy) Banerjee** is a PhD student in the marketing area, College of Business Administration, at the University of Rhode Island, USA. His research interests are in transformations of consumer behavior with rapidly changing technological environments. He holds relevant industry experience in fast-moving consumer goods with Eveready Industries, in logistics tracking and freight exchange solutions with the Venture InfoTech Group and telecommunications services with Bharti Telecom Group (AirTel brand). He has completed his undergraduate (BSc) (Hons) in economics from Presidency College Calcutta,

MBA in marketing from International Management Institute New Delhi and a certified training program on discrete choice analysis from MIT.

**Jounghae Bang** is an assistant professor of marketing at Penn State University, Mont Alto, USA. Her research bridges the areas of marketing and MIS. Her research interests are customer relationship management, relationship marketing, online marketing, data mining and e-commerce. She also studies luxury branding and service marketing. She was involved in several IS projects as an IT consultant at Deloitte Consulting in Korea and as a researcher in Ewha Center for Informatization Strategy (ECIS) at Ewha Womans University in Korea. She holds an MA in management information systems and a BA in business administration from Ewha Womans University in Korea.

**David L. Bourgoin** has instructed management and marketing for the University of Hawaii (USA) and economics, communication and law for the universities of Maryland (Europe and Asia), Thomassat (Thailand), Chaminade (HI) and Hawaii Pacific (HI). His research focuses on international business with emphasis on telecommunications, media, computers and trade. Dr. Bourgoin is also a business consultant specializing in marketing. He maintains an active law practice specializing in international business, intellectual property, real estate and trusts. Other pursuits include TCR Productions — a multimedia company active in TV productions with several theatrical movie projects. He also has a real estate brokerage company, a trading company, several environmental non-profits and is developing an Internet business portal for networking and data mining. Dr. Bourgoin received his JD from the USD, his MBA from UCLA, an accounting degree from St. Peter's (NJ), and has attended various doctoral courses at the University of Hawaii (economics) and Arizona State University (business administration). His teaching career required living in some 15 countries ranging from China to England, with travel experiences in some 150 nations around the world. Pro bono services include SCORE, ELAN and HOFA.

**James Carr** is a research fellow at the University of Edinburgh Management School and Economics (Scotland). Dr. Carr's research examines the social shaping of e-learning and e-government initiatives, e-learning implementation for the small business sector, organizational leadership in the Information Age, e- and m-business, e-portfolios and e-health. James has a keen interest in innovative approaches to online teaching and learning and has been involved in the design, implementation, evaluation and e-moderation of several e-learning projects in the higher education and healthcare sectors in the UK and Canada. Dr. Carr holds an Open University Business School certificate in e-moderation, a BSc (Hons) degree in agricultural economics from the University of Aberdeen

and an MBA and PhD in e-learning from the University of Edinburgh Management School and Economics.

**Inyoung Choi** is a postdoctoral research fellow at the Imaging Science and Information Systems Research Center at Georgetown University (USA). Her research interests include information strategy planning (ISP), strategic use of information technology (SUIT) and knowledge management. She has over 10 years of experience in information technology strategy development, system implementation planning and evaluation, including four years of experience as an IT consultant at Ernst and Young Consulting. Dr. Choi received her PhD, from Ewha Womans University in management information systems.

**Olivier Epinette** is associate professor of marketing at the Institut National des Télécommunications in Evry (France), member of the Groupe des Ecoles de Télécommunications. Dr. Epinette's main research domains are information and communications technology, business-to-business marketing, and service innovation. He has published several articles, book chapters and communications in the field of marketing and is the director of the final year major in "e-business" at the Institut National. He has participated in and managed various research projects dealing with the adoption and the use of ICTs by organizations. He was previously assistant professor for the Franco-Polish School of New Telecommunications and Information Technologies in Poland. Dr. Epinette holds a BA in economics, an MSc in business administration (DEA) and a PhD in business administration from the University of Angers.

**David Fortin** is an associate professor in marketing and a member of the Department of Management at the University of Canterbury in New Zealand. He has a PhD in marketing from the University of Rhode Island and several years' experience in product management for an international food manufacturer and advertising management as an executive for a medium-sized Canadian advertising agency. His dissertation proposal received an Honourable Mention in the Marketing Science Institute (MSI) Clayton Doctoral Dissertation Proposal Competition and was also a Finalist in the Southern Marketing Association Competition. Dr. Fortin's research has been published in outlets such as the *Journal of Advertising Research*, *Journal of Business Research*, *Psychology & Marketing*, *International Journal of Entrepreneurship and Innovation Management*, *Telematics & Informatics*, *AMA Summer and Winter Educators Proceedings*, *Academy of Marketing Science Proceedings* and *Marketing News*, amongst others. He is the director of the Online Experimental Consumer Research Project, "Web-Lab," funded in part by the University of Canterbury. His research focuses on the area of interactive marketing and e-

commerce, consumer research on the Web, advertising effectiveness, research methodology, genetically modified foods and attitude change and formation.

**Timo Kehr** works for the Mercedes Car Group of DaimlerChrysler AG in Stuttgart, Germany in central sales planning. His functions at Mercedes-Benz comprise global volume planning and several logistic optimization projects in the areas of supply chain management and flexibility management for the South African DaimlerChrysler plant. Recently he took over project responsibility for a major strategic redesign project at the Mercedes Car Group. Timo holds Master of Engineering and Master of Business degrees from Technische Universität Braunschweig and a Master of Business Administration from the University of Rhode Island.

**Nir Kshetri** is an assistant professor at Bryan School of Business and Economics, the University of North Carolina at Greensboro (USA). Nir holds a PhD in business administration from the University of Rhode Island, an MBA from Banaras Hindu University (India) and an MSc (mathematics) and MA (economics) degrees from Tribhuvan University (Nepal). Nir's works have been published in journals such as *Foreign Policy*, *IEEE Software*, *Electronic Markets*, *Small Business Economics*, *Pacific Telecommunications Review*, *Journal of Asia Pacific Business* and *International Journal of Cases in Electronic Commerce*. He has also contributed chapters to several books including: *Encyclopedia of Information Science and Technology* (Idea Group Publishing, 2005), *Indian Telecom Industry — Trends and Cases* (the ICAI University Press, 2005), *The Internet Encyclopedia* (John Wiley & Sons, 2004), *Wireless Communications and Mobile Commerce* (Idea Group Publishing, 2003), *The Digital Challenges: Information Technology in the Development Context* (Ashgate Publishing, 2003), *Architectural Issues of Web-enabled Electronic Business* (Idea Group Publishing, 2003) and *Internet Marketing* (2nd edition, Stuttgart, Germany: Schaeffer-Poeschel, 2001). Nir's works have been featured in *Foreign Policy*, a publication of the Carnegie Endowment for International Peace, and in *Providence Journal*. Nir was the runner up in the 2004 AMA/TechSIG dissertation competition and the winner of the 2001 ACR/Sheth Foundation dissertation award. He also won the first place in the Pacific Telecommunication Council's Essay competition in 2001 and second place in the same competition in 2000.

**Mark M. Lennon** is a doctoral student in international business at the University of Rhode Island (USA). With extensive academic and professional experience in Japan and East Asia, his research concentration is in mobile commerce and communications in Asia. In his recent writings, he has explored

topics such as dominant design and patterns of development in the proliferation of mobile communications and m-commerce in the Indian, Chinese and Japanese markets.

**Feng Li** is a professor and chair of e-business at the University of Newcastle-upon-Tyne Business School, UK. Previously he lectured at Strathclyde University Business School. For many years his research has focused on the interactions between information systems and emerging strategies, business models and organizational designs. He is the author of two books and many journal articles; he speaks regularly at international conferences and to business executives from both private and public sectors. He has worked closely with companies in banking, telecommunications, manufacturing, retailing and electronics as well as in the public sectors. Professor Li is the winner of the Blackwell Prize for E-Business and Technology Management at British Academy of Management (BAM2002). He is the chair of the E-Business and E-Government Special Interest Group (SIG) in BAM. His work on Internet banking and on the evolving telecommunications value networks and pricing models has been extensively reported on in the *Financial Times*, *Daily Telegraph*, *Guardian Weekly*, *Sky News* and the BBC. Blackwell will publish his book, *Strategic Innovation and Organisational Transformation through ICTs* in early 2006.

**Tobias Lührig** is a senior business consultant at McKinsey & Co. in Berlin, Germany. He received a doctorate from Technische Universität Darmstadt. Dr. Lührig holds a Masters of Engineering and a Master of Business from Technische Universität Braunschweig and a Master of Business Administration from the University of Rhode Island. His research deals with product development and with the relationship between suppliers and original equipment manufacturers in the automotive industry. Besides his professional interests, he is a passionate private pilot and a marathon runner.

**Chadinee Maneesoonthorn** is a PhD candidate in the Department of Management, University of Canterbury, New Zealand. Maneesoonthorn's research interests include e-commerce, m-commerce, permission-based and e-mail marketing, consumer behavior and consumer culture. Maneesoonthorn holds a BCom in business administration from Chulalongkorn University, Thailand, and a BCom (Hons.) and MCom in management from the University of Canterbury.

**Savvas Papagiannidis** graduated from the Physics Department, University of Newcastle-upon-Tyne, UK. Upon completion of his PhD, he joined the Business School of the same university. His research interests include high-tech entrepre-

neurship, management of small businesses and management of Internet and emerging technologies. Savvas has started a number of e-business ventures and also worked as a freelance Internet developer.

**Tommi Pelkonen** is a doctoral student at the Helsinki School of Economics, Finland. In his professional career he works as a management consultant specializing in mobile telecommunications, internationalization and business strategy formulation at Satama Interactive ([www.satama.com](http://www.satama.com)), a European digital services firm. He has worked on multiple mobility-related business projects and currently focuses on interactive television solutions at Satama Amsterdam. Prior to Satama, Tommi Pelkonen worked as project manager and senior researcher at LTT-Research Ltd. ([www.ltt-tutkimus.fi](http://www.ltt-tutkimus.fi)), analyzing the developments in the Finnish interactive service provision markets. This topic also forms the theme of his doctoral dissertation. Pelkonen holds an MSc (Econ.) and has authored several publications on the Finnish and European digital media landscape. In addition, Mr. Pelkonen has worked as IT-project supervisor and lecturer in the Information Technology Program (ITP) at the Helsinki School of Economics ([itp.hkkk.fi](http://itp.hkkk.fi)).

**Mats Samuelsson** is co-founder of Mobio Networks (USA), a Silicon Valley startup focused on mobile data services. Prior to this he has held a variety of management positions in startups and established telecommunications suppliers focused on mobile, broadband and fixed telecom carriers in all key world markets. Mats holds an MS in EE/CS from The Royal Institute of Technology in Stockholm, Sweden, an MEng in manufacturing from Boston University and an MBA from the Wharton School.

**Sanjeev Sardana** is co-founder of Mobio Networks (USA), a Silicon Valley startup focused on mobile data services. Prior to this he has held a variety of management positions with mobile carriers, financial services, telecom equipment and operator companies. Sanjeev is a graduate of IIT, New Delhi and holds an MS in computer science from Washington State University and an MBA from Columbia University.

**Pierre Vialle** is a professor of marketing at Institut National des Télécommunications in Evry (France), member of the Groupe des Ecoles de Télécommunications. He is director of the final year major in marketing for the School of Management. His main research areas are the strategies of IT, telecommunications and media companies and the marketing of related services, with an evolutionary, resource-based and industrial network perspective. He has

published several articles, book chapters and communications on these subjects, as well as a book called *Stratégie des Opérateurs de Télécoms* (Hermès, 1998). Pierre Vialle graduated from Ecole Européenne des Affaires (EAP) and holds an MSc in business administration (DEA) from Paris I University.

**Nicholas Williamson** is an associate professor at the Bryan School of Business and Economics, the University of North Carolina at Greensboro (USA). He also works closely with the faculty of the Department of Clothing and Textiles, School of Human Environmental Sciences at UNCG. Dr. Williamson received his AB, MBA and PhD from the University of North Carolina at Chapel Hill. His research focuses on global marketing strategies.

**Detlev Zwick** is an assistant professor of marketing in the Schulich School of Business at York University, Toronto, Canada, where he teaches courses on interactive marketing and marketing of (high-) technology. He has also taught at the Kogod School of Business at American University, Washington, DC. His research currently focuses on cultural aspects of consumer behavior in electronic, mobile and high-tech markets. In addition, he analyses the role of database technologies in the social and linguistic construction of marketers and consumers. His work has been published in several journals, including *European Journal of Marketing*, *Electronic Markets*, *Journal of Macromarketing*, *Journal of Computer-mediated Communication*, *Consumption, Markets and Culture* and *Journal of Consumer Behavior*. He has contributed to a number of books on Internet marketing in Germany and the U.S. His dissertation, *The Speed of Money: Investing as Consumption in the Age of Computer-Mediated Communication*, won a national award from the Marketing Science Institute for best research proposal. He received his PhD from the University of Rhode Island, USA.
