

Guest Editorial Preface

Security, Privacy, and Trust in Mobile and Multimedia Computing (SecPriTrust)

C. P. Gupta, Department of Computer Engineering, Rajasthan Technical University, Rajasthan, India

Nishtha Kesswani, Department of Computer Science, Central University of Rajasthan, Rajasthan, India

It is a great matter of pleasure for us to bring this special issue of the International Journal of Mobile Computing and Multimedia Communications (IJMCMC) covering the four relevant papers of “International Conference on Computers and Management (ICCM) 2016” that was organized in Rajasthan Technical University, Kota (Rajasthan) India on December 28-29, 2016:

- Secure Modified Ad hoc On-demand Distance Vector (MAODV) routing protocol (ICCM2016-55)
- Crisis Management Using Centrality Measurement in Social Networks (ICCM2016-74)
- A Novel Software Protection Approach for Code Obfuscation to Enhance Software Security (ICCM2016-89)
- Certain Investigation of Secured Data Transmission in Wireless Sensor Networks (ICCM2016-48)

The papers presented in the ICCM 2016 went through strict refereeing and examination resulting in a current rejection rate of 57.6%. We are delighted to say that this is in no small part due to the hard work the editorial board and reviewers, in not only refereeing the papers submitted but raising the standard of the quality of papers that we will publish.

Last but not the least, as the guest editors of ICCM 2016 submissions, we are thankful to people who have worked with us in planning and organizing both technical arrangements. In particular, we are thankful to program chairs for their support; the program committee for their timely reviewing of papers.

We hope that the quality research work published in this issue will be able to serve something new to Humanity and Science.

C. P. Gupta
